Call for Papers

The primary objective of this workshop is the presentation and discussion of the design, implementation, computational evaluation, and application of parallel algorithms in modern high-performance computing (HPC) environments for solving problems in business-oriented fields, including management science, operations research, data analytics, business administration and economics.

We invite submissions related to solving computationally intensive and business-oriented problems in a broad range of application fields, including (but not limited to) transportation, traffic, logistics, production, finance, marketing, energy, health and social networks.

Please, send all inquiries and submissions (title and abstract with a maximum length of 400 words) to hpbc2020@campus.uni-paderborn.de.
